

STABILease™

Stabilize your plant-based actives

Transform your plant-based actives into stable powder

- Cosmetics
- Dietary supplements
- Clinical and senior nutrition
- Instant beverages and mixes
- Animal nutrition

INNOV'IA is a technical authority in drying and microencapsulation processes. Applying extensive R&D and production expertise to customer powders, **INNOV'IA** develops and manufactures high-value-added ingredients for the food, feed, cosmetics, nutraceutical and pharmaceutical industries.

INNOV'IA

SERVICE OFFER

STABILease™

Your plant-based actives stabilized

by INNOV'IA

OUR CUSTOMER PROMISE

We protect and stabilize your sensitive actives.
We preserve antioxidant activity and optimize the durability and functionality of your ingredients.

- Stabilization against oxidation
- Improved incorporation into powder matrices
- Control of particle size distribution and flow properties

SERVICE DETAIL

- Definition of the appropriate process and intended application
- Pilot trials and production line testing
- Functional customization options
- Supply of the ready-to-use ingredient

Flex Technology™

A flexible combination of tailored solutions. We handpick the most relevant areas of expertise for each project:

- **Combined technologies:** drying, microencapsulation, agglomeration.
- **Customization options:** natural flavors & colorants, additives.
- **Tailored packaging solutions:** big bags, cartons, drums, bags, PE/aluminum pouches.

USE CASE • *Polyphenols for dietary supplements*

Spray drying and spray granulation transform **polyphenol-rich extracts** into stable and homogeneous powders.

This technology is particularly suitable **for dietary supplements and nutraceutical applications** where stability and dosing consistency are essential.

FRENCH INDUSTRIAL EXCELLENCE

35 years of expertise • 370 team members
4 production sites • 1 integrated R&D center • 9 spray drying towers • 13 fluidized bed units • Scale-up and industrial production
